

FLOR'Edhya

Equine feed supplement - Paste form

DIGESTIVE SYSTEM SUPPORT

FLOR'EDHYA is a concentrate of EDHYA TRANSIT in paste form for easier distribution.

It is prepared from yeast fermentation and lactic acid fermentation. These fermentations makes it possible to naturally produce nutrients that are easily assimilated (enzymes, amino acids, fermented sugars, trace elements, group B vitamins, etc.).

PURPOSE OF USE

- Dietary transition (weaning, reproduction, change of diet...)
- Reproductive phases (growth, gestation, lactation, insemination...)
- Digestive support and comfort
- Intestinal balance
- Loss of appetite
- Body condition
- Shiny coat
- Vitality
- Critical periods (change of environment, transport, competition...)

FEEDING INSTRUCTIONS - Administer directly in mouth.

Situation	Foals	Horses
After birth - Immune system strengthening	20 ml on the 1st, 2nd day and on foal heat
